PROFILE

B.Tech Computer Science student specializing in Data Science with strong foundations in Java, C++, Python, SQL, Data Structures and Machine Learning. Interested in software development, data-driven applications and problem solving. Seeking internship opportunities to apply technical skills through real-world projects.

EDUCATION

B.Tech — Computer Science Engineering (Data Science) | Galgotias University

Expected Graduation: 2028

TECHNICAL SKILLS

Languages: Java, C++, Python, C

Core CS: Data Structures & Algorithms, OOP, DBMS, SQL

Data & ML: Pandas, NumPy, Data Analysis, Data Visualization, Machine Learning

Web: HTML, CSS, JavaScript, Full Stack Development

Tools: Git, GitHub, VS Code

PROJECTS

Titanic Survival Prediction — Built a machine learning classification project using the Titanic dataset. Performed preprocessing, analysis, model training and evaluation; achieved approximately 80.45% accuracy.

Movie Rating Prediction — Developed a regression project using IMDb movie data. Cleaned features including year, duration, votes, genre, director and actors; compared Linear Regression and Random Forest, with Random Forest performing best.

Iris Flower Classification — Created a classification model using the Iris dataset to predict flower species from four numerical features; achieved 100% test accuracy.

CERTIFICATIONS

- C Programming — GUVI/HCL
- Computational Thinking — GUVI/HCL
- Object-Oriented Programming — GUVI/HCL
- Java for Beginners — GUVI/HCL
- Java Collections — GUVI/HCL
- DSA using C — GUVI/HCL
- Servlets & JSP — GUVI/HCL
- Mastering MySQL — GUVI/HCL
- Red Hat System Administration I (RH124 - RHA)
- Red Hat Training: Getting Started with Linux Fundamentals (RH104 - RHA)
- CRUD Operations in MongoDB — Credly
- Python Essentials 1 — Cisco Networking Academy / OpenEDG Python Institute
- Data Analytics Job Simulation — Deloitte / Forage
